SECURE YOUR HANGAR DOORS

Recent wind storms highlighted the need to secure hangar doors using all available locks. Several T-hangars were discovered with the main hangar doors unsecured and gapping open in the wind. To prevent damage to the doors and perhaps your aircraft inside, ensure all doors are securely closed and locked.

SAFETY CLASSES AVAILABLE

The Airport Fire Department conducts a variety of nationally-certified safety and training courses throughout the year. We can tailor a training program specifically for your needs.

We will teach an individualized program for one or a class of up to 20 people. We teach adult, child, and infant CPR, basic first aid and blood borne pathogens, AED familiarization, and fire extinguisher training that includes extinguishing actual live fires.

Call our office at 618-337-7478 for details.
